**Subject:** FW: Permit Status

Hi, will chat with you about this – also a discussion point for our unit meeting tomorrow.

Thanks, Mike. I suggest we set firm deadlines for ourselves on getting the permits to the states (or tribes) and that we then communicate with them more explicitly on when we anticipate sending things their way. I note that getting permits out the end of this week would give states about 30 days in advance of an Oct 1 draft going out for comment.

I mentioned to Susan last week, but Andrew Sayers-Fay expressed interest in seeing any preliminary documents we could share to allow them to get a start on the couple of AK certs.

Seeing Susan's end of day report reminded me that the current thinking on the WA hydro is individual permits but grouped into three fact sheets: lower Columbia, Snake, Grand Coulee. First draft referenced below will be a template. Jenny is gathering information (largely around intake structures) – out in the field last week and at Grand Coulee today. fyi

WA Hydro. John Day permit - I spent a few hours with Jenny last week walking through the provisions. I think it will be ready to go to State soon.
